WORK EXPERIENCE

UK Healthcare **December 2023 – Current**

IT Field Service Technician *Lexington, KY*

- Provide enterprise desktop support and endpoint lifecycle management across multiple clinical and administrative environments within the UK HealthCare system.
- Led endpoint deployments for a large-scale Windows 11 enterprise refresh project involving over 4,000 devices, ensuring seamless transition for clinical and administrative staff.
- Perform enterprise device imaging and operating system deployment using PXE boot environments, including BIOS configuration, driver management, and automated deployment scripts.
- Manage Active Directory device placement and organizational unit assignments to ensure correct Group Policy application and network resource access.
- Utilize SCCM and Intune to monitor device connectivity, verify system compliance, and troubleshoot software deployments and update failures.
- Administer Mac device management through JAMF, supporting configuration, troubleshooting, and system updates for enterprise macOS environments.
- Use Dell Command Update daily to maintain hardware driver and firmware compliance across deployed systems.
- Support enterprise infrastructure, including Active Directory, Group Policy, DNS, DHCP, network authentication, and enterprise file shares.
- Troubleshot and resolved complex hardware and endpoint issues, including:
    - Docking station and multi-monitor display failures
    - USB-C controller and hardware interface issues
    - Driver conflicts and OS-level device failures
    - VPN connectivity problems
    - User profile corruption
    - Network authentication and connectivity issues
- Support enterprise clinical systems, including EPIC, Citrix environments, VMware Horizon, and thin client endpoints.
- Participated in multi-site IT deployments across the Lexington region, supporting multiple clinics and hospital facilities.
- Utilized PowerShell, batch scripting, and CLI tools to automate device configuration tasks, install software packages, and perform system diagnostics.
- Assisted with software deployment validation and troubleshooting through System Center tools to ensure successful enterprise patching and application updates.
- Collaborated daily with physicians, nurses, clinical administrators, and hospital leadership to resolve technical issues with minimal disruption to patient care.

EDUCATION

University of Kentucky **2014 - 2016**

Bachelor of Science in Computer Science *Lexington, KY*

I have completed programming, electrical engineering, literature, and mathematics coursework.
